

Symposium DOS kongressen 2017

Friday 27.10.2017

Time: 1:00 – 2:30 pm

Lokale: Ballroom C

“Bone infections – animal models and clinical research”

The aim of the symposium is to give an introduction to development and organisation of animal and clinical studies of bone infections. Focus will be on what to consider prior to and during the experimental study period to obtain reliable and reproducible results. Results from animal models and clinical studies of bone infections will also be included in the presentations.

Programme:

- 13:00–13:05 **Introduction**
*Assistant professor Louise Kruse Jensen (DVM, PHD),
University of Copenhagen*
- 13:05–13:25 **Experimental animal studies of bone infections
– Focus on porcine models**
*Assistant professor Louise Kruse Jensen (DVM, PHD),
University of Copenhagen*
- 13:25–14:00. **Clinical studies of bone infections**
*Professor Martin McNally (MD FRCS Ed, FRCS (Orth),
Oxford University Hospital*

14:00-14:10 **A combination of clinical and animal studies of bone infections**
*Consultant Orthopaedic surgeon Hans Gottlieb (MD, PHD),
Herlev Hospital*

14:10-14:30 **Time to discuss and questions**
